Indoor
Marshalling
Kiosk

A Marshalling Kiosk is a digital or physical station designed for directing and managing resources, tasks, or people in an organized manner. Used in various industries like energy, utilities, or industrial automation, an indoor marshalling kiosk provides users with interactive touchpoints that streamline operations and communications within enclosed spaces such as airports, factories, warehouses, or event venues. Its key functionality is to manage workflows, assign tasks, and facilitate easy navigation or information access.
